Weekly PM Exchange Traded Fund (ETF) Monitor™**1. Product Description**

The Weekly Precious Metals (PM) Exchange-Traded Fund monitor is a detailed spreadsheet containing key information and week to week changes in physical metal holdings that are held (Thursday - Thursday) on behalf of investors in the key precious metals backed exchange-traded funds (ETF's).

Precious metals backed exchange traded funds/commodities have over the last years grown to become key investment vehicles and currently stand for a major share of the investment demand in these metals.

Subsequently, the Daily Precious Metals Exchange-Traded Fund monitor is an essential tool in tracking investment flows, which are on their turn crucial, affecting both price movements and sentiment in these metals markets.

The publication focuses on Gold, Platinum, Silver and Palladium as the four tracked markets and on a weekly basis keeps track of redemptions or purchases in these ETF's. Furthermore, thorough analysis on flows and totals, statistical research and ETF-specific news are provided.

For more information, please take a look at the product demo or contact us at sales@goldessential.com

Note: Clients that are subscribed to the Weekly PM Exchange-Traded Fund monitor will not have access to the Daily PM Exchange-Traded Fund monitor, but may choose to upgrade their subscription.

More information on pricing can be obtained at sales@goldessential.com.
