Premium NewsRoom (GoldWire™ and TraderWire™)**1. Product Description**

The Premium News package is intended to be standalone newsfeed built around the global gold market that consists out of multiple categories in order to form a standalone, all encompassing and unifying news source that covers the global gold market:

1.1 GoldWire™

The Goldwire™ component ensures continuous market coverage on the global gold market and is built around two sub-components:

- Market Reports:

Written in-house by our leading precious metals analysts, we report on the evolution of the gold market, focusing on what's really going on and driving price evolutions, thereby striving towards the highest detail and accuracy.

Reporting starts in the late Asian session, spans the entire London and U.S. timeframes and runs into late New York after-hours dealings. These reports offer our client a powerful tool to quickly act on market changes, and to be the first to know what's *really* going on.

Reports are geared towards coverage of global spot gold prices and benchmark COMEX (CME) gold futures, but equally incorporate reporting on TOCOM (Tokyo Commodity Exchange) and MCX (India's Multi Commodity Exchange), as well as all other markets that affect gold.

- Real-Time News

Breaking news on gold and precious metal ETF's, trade data and statistics, central bank interventions; the Goldessential Real-time news service often is the first to know, which allows clients to act, fast.

1.2 TraderWire™

We keep a close connections to precious metals traders and dealers around the world, which often provide vital insights into the market sentiment, liquidity and otherwise difficult to assess market parameters.

The TraderWire™ is built as a complementary tool to the GoldWire™ component, and gives our clients more key first-hand data. Data from the heart of the market, reliable and otherwise hard to obtain.

For more information, please take a look at the product demo or contact us at sales@goldessential.com

Note: Sub-components (**GoldWire™** or **TraderWire™**) of the Premium Newspackage can be obtained separately upon request.
