

## What is it?

The Goldessential real-time trader (RTT) is a **web-based instant-messaging platform** (accessible both through web and mobile gateways) that enables the user to log-in to, and receive **real-time** trading (buy/sell) strategies on the benchmark COMEX gold futures contract (GCxx), extended with real-time strategies on the headline EUR/USD currency pair.

The RTT is a proven tool that has been developed *for* and *by* traders that are looking for an innovative way to extend their successes on a sustainable, yet different way.

The fundamental pillars around which the tool have been developed are simple:

- **Acting** on market movements rather than **anticipating** on them.
- **Continuous** risk monitoring and active leverage management.
- Providing **tailor made** advice that suits the client's profile.
- A **short-term** perspective that is based on minimizing market exposure time.
- Less is more: we look for the handful of opportunities that **are** successful.

## Who is it for?

The RTT tool has primarily been developed for traders that have direct access to trade the benchmark COMEX gold futures contract. Due to the intrinsic short-term focus, the platform is mainly aiming for day-traders seeking opportunistic though sustainable value creation.

This category thereby includes hedge funds, private/proprietary traders and financial institutions that are seeking a higher risk/return ratio on a given portfolio.

## Why should you use it? (0/1)

Our innovative strategies have a proven track record and excel in their profitability in a short-term timeframe. Our fundamental pillars thereby guarantee a sound & continuous risk management, which reduces the downside risks. This risk is further diminished by the tool's unique approach to seek strategies that limit the market exposure time.

## Why should you use it (1/1)

The addition of strategy issuing for the headline EUR/USD currency pair moreover increases the trading opportunities, and *can* at times be useful to partially hedge risk in gold trades due to the intrinsic, yet variable gold – U.S. dollar relationship.

## How does it work?

- *Step 1: A first acquaintance with the client, where we find out about his trading habits, risk appetite and profit expectations.*
- *Step 2: We fine tune the strategy filtering, deployed on the customer's specific likes/dislikes. A trial period follows.*
- *Step 3: If necessary, further fine-tuning is done until the client is satisfied. Subsequently, the strategies can be fully deployed.*

## Facts

- Trading strategies are issued from Monday to Friday, **6.00GMT up to 22.00GMT**, with a break between 12.00GMT and 12.45GMT. As such, there are over **15 hours of continuous coverage** per day, starting in the late Asian session, covering the entire London/European session and running to after hours NY dealings.

For reference: COMEX open-outcry trading

**starts:** 13.20GMT

**settles:** 18.30GMT

-We hold dear to sustainability & customer satisfaction. We therefore feel that customization is a must.
